Events Made Simple and Smart

ABSTRACT

- Traditional event management often requires attendees to depend on organizers or volunteers for registration, schedules, venue information, and announcements.
 - This dependency can result in long queues, repeated queries, communication gaps, and difficulty in managing attendee information.
 - EventEase is a mobile self-service platform designed to give attendees independent and convenient access to event services.
 - Attendees can create accounts, browse and register for events, view schedules, select or track sessions, and access venue and speaker details.
 - The system centrally manages attendee, event, session, registration, venue, speaker, and notification data.
 - The main goal is to reduce manual workload for organizers and provide attendees with faster, organized, and independent event services.
-

PROBLEM STATEMENT

- Attendees often depend on organizers for basic event services.
 - Manual registration and information sharing can cause delays and long queues.
 - Repeated queries about schedules, venues, and speakers increase organizer workload.
 - Communication gaps may occur when organizers are unavailable.
 - Seat allocation and registration status can be difficult to manage manually.
 - A centralized self-service system is needed for faster and organized event management.
-

MOTIVATION

- Reduce dependency on organizers and volunteers.
- Provide attendees with information anytime.
- Make registration faster and more convenient.
- Provide automatic seat allocation after confirmation.
- Handle payments and transactions consistently.
- Allow attendees to raise complaints when organizers are unavailable.
- Improve the overall event experience.

OBJECTIVES

- Develop a centralized event management database.
- Allow attendees to browse and register for events.
- Provide schedules, session, venue, and speaker information.
- Process registrations and payments using transactions.
- Automatically allocate seats after successful confirmation.
- Provide notifications and attendee support.
- Reduce manual workload for organizers.
